

Supply Chain Management

SK innovation considers the headquarters, business sites and partner companies as the scope of its social responsibilities and it is supporting partner companies to grow together with us.

SK innovation provides a variety of mutual growth programs to reinforce supplier competitiveness and our overall growth ecosystem.

During the second half of 2021, we are progressively expanding our mutual growth support programs to Tier-2 suppliers.

Supply chain management policy

SK Innovation has reorganized its supply chain management system from the perspective of ESG management with the goal of Green Balance 2030. We are currently required to comply with ESG code of conduct for suppliers.

Code of ethics for purchase

- Basic Principles of Fair Transparent Transaction
- Compliance with laws and international conventions
(declaration of human rights, UNGC, etc.)
- Reporting violations and protecting informants

Bidding guide

- Principles of selecting suppliers, bidding process, detailed guidelines, etc.

ESG Code of Conduct for suppliers

- Human rights and labor, safety and health, environment-friendly workplace management, compliance with corporate ethics, prohibition of the use of conflict minerals, management system

General principles of purchase within the purchase management regulations

- Comply with corporate social responsibilities such as shared growth and labor, human rights, anti-corruption, environment, etc.
